- 83.2%

**High School,** *Shiv Mahesh Balika IC Gauriganj Amethi*                    2016
- 82.83%

## TECHNICAL SKILLS

| | | | |
|---|---|---|---|
| Data Structures and Algorithms | ● ● ● ○ ○ | Database : Mysql | ● ● ● ○ ○ |
| Programming Language : Java | ● ● ● ○ ○ | Web Technologies : HTML, CSS, Java Script | ● ● ○ ○ ○ |
| Tools : Intellij Idea, Visual Studio | ● ● ● ○ ○ | Operating System : Windows | ● ● ● ○ ○ |
| Spring Boot | ● ● ○ ○ ○ | | |

## PROJECTS

**User Management in Java and Spring Boot**
- CRUD operation
  - **Creating** user via registration page
  - **Read** user by its id/email/mob
  - **Update** user details
  - **Delete** the user by its id/email/mob
- Technology used
  - Spring boot – framework for enterprise application
  - Template engine(thymleaf) – To bind the data with html pages
  - Database – My SQL and in-memory database(H2)
  - Github – Code sharing

## Expiration Reminder Application

- This Android-based Application assist by sending you an alert when your food is close to expiring. This app will scan the barcodes of packed food and then send a reminder to the owner when the food expires, thereby reducing food waste caused by confusion in food labeling.
- Technologies Used
  - Android Studio
  - Java
  - Firebase
  - XML

## Portfolio Website

- Link to my Portfolio website -
https://mauryapriyanshu.github.io/Portfolio/
- Showcases - Education, Project, Skills & Training and etc.
- Technologies Used
  - HTML
  - CSS
  - Javascript
- IDE - Visual Studio code

## Amazon Clone

- Link to Amazon Clone -
https://mauryapriyanshu.github.io/AmazonClone/
- Created an e-commerce website replicating Amazon's user interface and design using HTML and CSS. Developed product listing pages, and a visually appealing layout.
- Technologies used
  - HTML
  - CSS
- IDE - Visual Studio code

## Coupon Service

- The Generic Coupon Service is a versatile and easily integrable service that allows companies to manage and offer coupons to their customers on their portals. This Spring Boot-based service provides a set of features for administrators to create, update, and disable coupons, and for users to access active offers based on product brand, category, and current date.
- Technologies Used
- Spring Boot
- MySQL & H2 Database
